DETAILED ACTION

Response to Arguments

Applicant's arguments with respect to claims have been considered but are moot in view of the new ground(s) of rejection.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 3, 48, 50, 53 – 54 and 57 are rejected under 35 U.S.C. 102(b) as being anticipated by Allaire et al. (US 5,447,499).

With reference to claim 1, Allaire et al. (hereinafter "Allaire") discloses a tampon applicator barrel having an outer surface and a three-dimensional tape connectable to a portion of an outer surface, the tape including a first surface and a second surface opposite the first surface, the first surface having formed thereon at least one integrally formed gripping structure, said second surface being connected to a release liner as set forth in col. 4, lines 24 – 35 and in figure 1.

With reference to claims 3 and 48, Allaire discloses at least one gripping structure that extends inwardly or outwardly (with respect to other elements of the device) from the first surface as set forth in figure 1.

As to claims 50, 53 – 54 and 57, see figure 1.

Art Unit: 3761

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Claims 4, 6 – 7, 13, 16 – 18, 23, 49, 51 – 52, and 55 – 56 are rejected under 35 U.S.C. 103(a) as being unpatentable over Allaire et al. (US 5,447,499).

The difference between Allaire and claim 4 is the provision that the threedimensional tape includes a plurality of gripping structures.

It would have been obvious to one of ordinary skill in the art to modify the threedimensional tape of Allaire to provide a plurality of gripping structures since it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art.

As to claims 6-7, 13, 16-18, 23, 49 and 56, the examiner contends that absent a critical teaching and/or unexpected result, the claimed limitations are obvious matters of design choice that do not patentably distinguish the claimed invention from the prior art.

The difference between Allaire and claims 51 – 52 is the provision that the gripping structures have a specific height and width.

Application/Control Number: 10/073,657

Art Unit: 3761

It would have been obvious to one of ordinary skill in the art to modify the height and width of the gripping structure of Allaire to provide the most effective product since it has been held that where the general conditions of a claim are disclosed in the prior art, discovering the optimum or workable range involves only routine skill in the art.

As to claim 55, see the rejection of claims 51 - 52.

Conclusion

Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Michele Kidwell whose telephone number is 571-272-4935. The examiner can normally be reached on Monday - Friday, 5:30am - 2:00pm.
